

How *smart* is your network?

DIGITAL BRIDGE

Features

- Available in 8 or 4 port configurations - 4 ports per bridge module
- Plug-in module design provides easy maintenance and expandability
- Configurable as 7:1 or 3:1 bridge via internal connections without consuming ports
- Each port individually selectable as DTE or DCE, RS-232/423 or RS-422/485
- Broadcasts host system polls to all stations, routing the one responding station back to the host
- In peer- to-peer applications, any message from a station on the bridge is replicated to all other stations in the network
- Automatic lockout feature prevents interference on transmissions that have already been granted access to the bridge
- Supports protocols that do not include EIA modem control signals
- Anti-streaming, designed to prevent runaway or failed stations from tying up your network
- User Manual
- One year warranty
- Unlimited customer support

The Westronic **Digital Bridge** is an ideal solution for achieving all-digital serial data concentration in your network. As a result, connectivity is simplified, speeds are improved and maintenance is reduced throughout your telemetry network.
