Westronic
Intelligent Network Management Solutions

How smart is your network?

DUAL/QUAD MODEM

Features

- Available in Dual or Quad modem configurations
- User-selectable digital interfaces configurable for RS-232, RS-422 or RS-485
- RS-485 multi-point option permits a single remote telemetry unit or collection port to connect up to 32 modems
- Operate in point to point arrangement, eliminating troublesome analog bridges
- 1200 bps normal operation
- RATE ADAPTION option allows the modem to transport 2400 bps TBOS data via the 1200 bps modem
- Upgrade from Dual to Quad by inserting modem plug-in module
- Clock recovery option allows the modem to transport synchronous telemetry protocols over asynchronous order wire or other similar facilities
- Designed for 19" or 23" rack mounting
- User manual
- One year warranty
- Connector kits, external power supplies available
- Unlimited customer support

The Westronic **Dual/Quad Modem** is a single rack space enclosure that may be equipped with one or two 202T Eurocard-style dual modems. Created specifically for central office telecommunications applications, its simple, low maintenance design ensures trouble free operation.

How smart is your network?

Westronic modems are unique in that they can provide an RS-422 or RS-485 interface, as well as RS-232/RS-423. One common application is to use a dual modem shelf in a site requiring more than one E2A address. With one modem providing an RS-485 interface, several **WS2000** e-Telemetry systems can be connected to one analog facility. This arrangement avoids problem prone analog bridges or multiple circuits to the site.
