

# How *smart* is your network?

## WS1000

### Features

- Remote site monitor featuring 64 or 128 discrete collection input points
- 2 serial ports, for upstream and/or pass through connections
- 8 - 40 discrete control outputs
- Built in wire-wrap panel with wiring connection references on flip-down door
- Local alarm summary control output
- TBOS or TABS host reporting protocols
- Supports both RS-422/485 standard host interface
- Optional RS-232 interface
- Optional internal 202T/V.23 modem
- Optional mounting bar allows single installation or in pairs in a 19" or 23" standard rack
- Up to 32 WS1000 units can be attached to a single TABS bus
- Cables, racks available
- -24/-48VDC standard operation
- One year warranty
- Unlimited customer support and user manual

The **WS1000** was the first high-density telemetry unit that introduced a unique design integrating field wiring and system electronics into a plug-in frame style remote alarm block. This design allows service without disturbing the front accessible field wiring.

For simple discrete alarm collection and remote controls, the **WS1000** is the most cost effective solution to add remote sites into your **surveillance** network.
